PROJECTS

Self Tutoring Application Using Custom Agent Framework | React.js | Python | FastAPI | NLP | RAG | LLMs

- Developed an AI-powered self-learning platform that provides personalized study plans, real-time doubt solving, adaptive quizzes, and progress tracking.
- Integrated NLP, RAG, LLMs, and memory-based context for concept explanations, notes, summaries, and personalized recommendations.
- Implemented performance analysis and weak-topic detection to adapt learning based on individual student progress.

Intellectus — AI-Powered Classroom & Learning Platform | React | TypeScript | FastAPI | PostgreSQL | AI/NLP

- Developed an AI-powered learning platform that records lectures and converts speech into structured notes using speech-to-text technology.
- Implemented automated quiz generation, student performance tracking, personalized learning, and feedback features.
- Built the application using React, TypeScript, FastAPI, PostgreSQL, and AI/NLP technologies to provide an interactive learning experience.
- Integrated RAG and chatbot capabilities to help students clarify doubts and access relevant learning content.
